A Renewed Pedagogy is our Thrust

Our Educational Institution intends to become the living expressions of moral, intellectual and integral development. Our each child is prepared to grow as builders of society, family and agents of social change in this digital age. UMI educators must remember, we are educating next-gen tech students and hence we require to change the approach and methodology in all levels, as per UMI vision and mission:

Vision: Education for wholeness through Faith, Love and Service.

Mission: Integral formation of the youth to bring about a personal synthesis between faith and culture.

Our Foundress Blessed Brigida Morello lit a flame to ignite the minds of the girls of her time in 1640's. Today it is our bounden duty to spread its sparks everywhere through our students, staff, alumnae, all the stakeholders and well wishers. Therefore we need to foster Montessori Method, which is child-centered and emphasizes independence and respect for a child's natural psychological, physical, and social development.

Hence I request all of you-parents, staff and students to collaborate and support each other to promote independence, self-discipline, and a love for learning. Let the children develop strong problem-solving skills, critical thinking skills and the ability to work collaboratively in all stages of their intellectual, social and emotional aspects. I am deeply grateful to one and all, for your timely assistance and dedication. May God take care of you.

Sr. Shiny Thomas

Vice Principal's Desk

Self Discipline Creates a Brighter Tomorrow

Dear Students, Parents, and Staff,

As we strive for excellence in education, I want to emphasize the importance of discipline in our school community.

Discipline is not just about following rules and regulations; it's about developing self-control, responsibility, and respect for others. It's about creating an environment that is conducive to learning, growth, and success.

As a school, we are committed to maintaining a safe, supportive, and inclusive environment that allows every student to thrive. To achieve this, we expect all members of our community to adhere to our code of conduct and respect the rights and dignity of others.

Let's work together to promote a culture of discipline, responsibility, and mutual respect. By doing so, we will create a positive and productive learning environment that benefits everyone.

Thank you for your cooperation and commitment to our school's values.

Sr. Litty Mathew

Dear Readers,

‘Excellentia’ is a role model for the unbound creativity and life flow.

This newsletter summons a variegated approach to present our students’ creative juices in art, literature, sports, culture etc.

The students are prolifically encouraged to chart their imagination with no discrimination

over sense and an influx of their mentors. Flexible and tailor-made education with a blend of cultural diversity are the hallmarks of Mariampur. We believe in ingraining an integrity of character with a compassion for the community and environment. This year we have introduced several new initiatives aimed at enhancing student learning and well-being with expanded counselling services & new technology integration-based learning programmes. As we look into the future, we remain committed to our mission of providing education that prepares our students for success in an ever-changing world. We are excited to build on our achievements and continue to strike for excellence in all areas. As we reflect on the passed year, we are filled with sense of pride and accomplishment.

We want to express our gratitude to our Manager, Principal, Administrator, Staff, Parents & Students for their support, dedication & enthusiasm.

Thank you for your ongoing support and engagement we are grateful to be a part of such a vibrant and caring community.

Teachers' Orientation

The teachers attended a series of workshops as a part of ongoing efforts to enhance teachers' development & improve students' outcome.

Guidance & Counselling session for Mothers

Counselling sessions are safe space for parents to explore their feelings & sort out issues without judgement or blame.

The teachers counselled the mothers on behavioural issues, stress, personal inadequacies faced by their children.

Senior Co-ordinator's Message

*“Crafted with Elegance, Nurtured with Care,
The wave of Excellence rides in the Air.”*

In the confrontation between stream and the rock, stream always wins not through strength but perseverance. At Mariampur Sr. Sec. School, children are encouraged to say “I see it, I understand it and I can do it.” Our aim is to nurture students with love, make them realise that serving humanity is their goal and imbue them with all those virtues that become catalyst in their all-round development.

Our students are our biggest asset. Mr. Narayan Murthy former chairman and CEO of Infosys Technology rightly said, “Education is about raising the confidence of an individual to think of a working dream and to translate that dream to reality by high performance action.” I am fully confident that our students will meet this standard of education as future citizens of the world.

Dear students always remember, “Dreams are like stars, you may never touch them but if you follow them, they will lead you to your destiny.”

–Ms. Sangeeta Mehrotra

Academic Co-ordinator's Message

Breathe to Achieve

As a educator, we strive to provide our students the best possible environment to learn and grow. In this article we will explore how increased Oxygen intake can enhance their performance.

Oxygen is the unsung hero of student life. This essential element plays a critical role in cognitive function, memory, and focus. When students receive adequate oxygen, they experience improved concentration, enhanced creativity, and better retention of information.

Adequate oxygenation also boosts energy levels, reduces stress and anxiety, and promotes overall well-being. Conversely, oxygen deprivation can lead to decreased focus, fatigue, and decreased academic performance.

By incorporating simple practices such as deep breathing exercises, outdoor activities, and proper ventilation, students can optimize their oxygen intake. By prioritizing oxygen, we can unlock full potential and empower to achieve academic excellence.

-Dr. Seema Srivastava

THE DYNAMIC SCHOOL LIBRARY: WHERE DREAMS COME TRUE

The school library is the birthplace of dreams and fantasies. The stories shared by grandmother, grandfather, mother, and father come to life when children touch the pages, inhale the scent of the books, and immerse themselves in the vibrant colours of the illustrations. Each story becomes a tangible experience, awakening the senses and bridging the gap between imagination and reality.

It is rightly said that: -"Books are precious things but more than that they are strong backbone of civilization".

Books are the greatest treasures of humanity, holding within their pages the wisdom, experiences, and knowledge of generations. By reading, one unlocks a world of endless discovery, expanding the mind, enriching the soul, and empowering the individual to shape their own path in life. The pulse of the students is probably felt in the best way in a school library. Our school library supports school programme as well as the teaching and learning process. Our school library has adequate collections of textbooks, encyclopaedias, magazines, fictions, biographies and variety of story books to foster reading habit in students.

In Mariampur Sr. Sec School, the library has more than 16000 books of different genres written by renowned authors.

-Ms. Divya Bakre
Librarian

A Journey of Growth and Gratitude

It is often said that the roots of education run deep, and for me, those roots have always been firmly planted in the hallowed grounds of Mariampur Sr. Sec School. My journey with this institution is one of continuity, growth, and an enduring bond that has shaped both my personal and professional life. I take immense pride in sharing that I am not only a teacher here but also an alumnus. This school has been a second home to me, a place where my dreams were nurtured, my potential was recognized, and my values were instilled. As a student, I learned to aim high and work hard; as a teacher, I now strive to pass on those same lessons to my students. Over the past 10 years of my service, I have witnessed the school evolve, yet its essence remains unchanged: a commitment to excellence in education and character-building. Being a part of this legacy, both as a student and as a teacher, is a privilege I cherish deeply. As I reflect on this journey, I am filled with gratitude for the mentors who shaped me, the colleagues who support me, and the students who motivate me. Mariampur Sr. Sec School is not just a place; it is a beacon of learning and a community of hearts bound by shared values and aspirations. Here's to many more years of learning, teaching, and growing together under the banner of our beloved institution!

-Ms. Christina Masih

मेरे भारत मंदिर स्वरूप शत शत नमन

ऐ मेरे भारत मंदिर स्वरूप शत शत नमन
खेतों में फैली हरियाली,
करते किसान हैं रखवाली
उगता सूरज फैली आभा
पीली सरसों नीली छवि ले,
ये उमड़ घुमड़ आए मेघा
ऐ मेरे भारत मंदिर स्वरूप शत शत नमन
मंदिर, मस्जिद, गुरुद्वारा, चर्च सबमें होती हैं प्रार्थनाएँ,
मेरे सुंदर से भारत को नज़र किसी की ना लग पाए
ऐ विशाल पर्वत, सागर, नदियों वाले
मेरे भारत मंदिर स्वरूप, शत शत नमन..
ये रिमझिम पड़ती ठंडी फुहार
मानो बदरा गाए मल्हार
दौड़े भागें, खेले कूदें बच्चे कैसे हो रहे आह्लाद
ऐ मेरे भारत मंदिर स्वरूप शत शत नमन..
ये रंग बिरंगी साड़ी पहने कौन सुंदरी आई है,
मेरी ये बातें सुनकर देखो धरा कैसी इठलाई है
शान्ति का संदेश देने वाले, विश्व को बन्धू कहने वाले
मेरे भारत मंदिर स्वरूप शत शत नमन

There are no shortcuts to Success

In life there are no shortcuts. All things are connected. For success there is no fast lane. Success is a journey not a destination, it demands that we put in the time and efforts to develop our skills, build our knowledge and overcome obstacles. There are no substitutes for persistence, resilience and willingness to learn from our mistakes. By embracing the process and staying committed to our goals we can achieve true success that is both fulfilling and sustainable.

The Indispensable Role of Social Science: A Beacon for Informed Citizens

In our ever-evolving world, the significance of social science cannot be overstated. It is the compass that guides us through the labyrinth of human history, culture, and society. At Mariampur Sr. Sec. School we recognize the pivotal role of social science in shaping well-rounded individuals and responsible citizens.

Why Social Science Matters

Social science is not merely a subject confined to textbooks; it is the very fabric of our daily lives. It equips us with the knowledge and skills to Understand Our World by delving into history, geography, economics and, political science. Here we learn about past civilizations, current global issues, and the intricate workings of societies.

Social science also fosters critical thinking by encouraging us to analyse information, question assumptions, and form informed opinions. It empowers us to think critically about social, political, and economic issues. It also cultivates a sense of civic responsibility and encourages active participation in the society.

At our school we are committed to making social science learning an exciting and enriching experience. We employ a variety of activities to spark curiosity and foster a deeper understanding of the subject.

We begin each morning assembly with thought-provoking quotes from renowned social scientists, philosophers, and historical figures to inspire critical thinking and reflection.

We dedicate a portion of the assembly to discussing current events, encouraging students to analyse news articles and form their own opinions.

We also organize debates on pressing social issues, such as climate change, poverty, and inequality, to foster critical thinking and develop persuasive communication skills. Not only this, we also organize community outreach programs, such as volunteering, charity drives, and awareness campaigns, to instil a sense of social responsibility and civic engagement.

By actively participating in these activities, students develop a lifelong passion for learning and a commitment to making a positive impact on society.

Let us embrace the power of social science and work together to create a brighter future for ourselves and generations to come. I would end by saying

***Past and present, a knowing glance,
Nations rise, a future's chance.
Human story, a lesson learned,
Social studies' wisdom, ever earned.***

**Ms. Abha Pande
Humanities Faculty**

शेक्सपियर का प्रसिद्ध कथन है -यह संसार एक रंग मंच है और सभी इंसान मात्र अभिनेता है। प्रत्येक इंसान का जन्म इस संसार में एक किरदार के रूप में होता है। किरदार अर्थात रोल, जैसे-जैसे इंसान बड़ा होता जाता है वह अपने किरदार को पहचानने लगता है -जैसे बेटा, बेटी, भाई, बहन, माता-पिता, डॉक्टर, इंजीनियर, मैनेजर, क्लर्क, शिक्षक, विद्यार्थी आदि अनेकों किरदार में इंसान अपना चुनाव स्वयं ही कर लेता है, परंतु सबसे महत्वपूर्ण यह है कि जो भी किरदार वह चुनता है उस किरदार को निभाना उस व्यक्ति का कर्तव्य हो जाता है दिन-रात आंधी तूफान कुछ भी हो, व्यक्ति को अपने रोल को निभाने के लिए तैयार रहना होता है। परंतु यथार्थ में सबके साथ ऐसा होता नहीं है, जिस जिस रोल में इंसान होता है वह उसका नाम तो प्रयोग करता है मगर कर्तव्य के प्रति जागरूक नहीं होता है, अगर कर्तव्य निभाता भी है तो फिर मजबूरी में, दबाव में या फिर डर से। इससे वह निरंतर दुखी रहता है और स्वयं को प्रसन्न करने के लिए वह दूसरे साधन ढूंढता है जो उसे अपने कर्तव्यों से निरंतर दूर करते जाते हैं, फल स्वरूप सफलता भी बहुत दूर होती जाती है, इसलिए यह अत्यंत आवश्यक है कि हर व्यक्ति अपने किरदार को पहचाने और उसके लिए जो भी आवश्यक है वह सब कुछ हर हाल में करें तभी व्यक्ति पूर्ण रूप से प्रसन्न रह सकता है।

(हिंदी विभाग)

THE POWER OF GRATITUDE:-A SIMPLE WAY TO HAPPIER YOU

Dear Children,

Nowadays it's observed that we all have a complaining attitude in us. We are always unsatisfied with what we have and urge to have more and more in life simply copying others. I would just like to ask you that- Have you ever stopped to think about good things in life?. The little joy, the big blessings, the people who love and support you? If not, its time to start. Gratitude is a powerful tool that can transform your outlook on life and make you happier and more fulfilled.

When we focus on what we're grateful for, we shift our attention from negativity and stress. This can reduce feelings of anxiety and depression. Gratitude can also strengthen our relationships, as expressing thanks can deepen our bonds.

So with a positive mindset, write 3 things you are grateful for each day, let people know, especially your parents how much you appreciate them; do good to others. I'm sure that if you inculcate these habits you can improve your mental and emotional well being.

Remember, Gratitude is a choice. Let's cultivate it and live a happier and more fulfilling life.

Ms. Silky Juneja

Gender Differences and Sports

Throughout history perceptions existed that men are superior to women. The development of women was, and in some cases still are, suppressed by cultural and religious beliefs. Intolerance in many cases made the development of female sports/athletics difficult.

Traditionally women were not allowed to the competition areas, as men were competing for honour, wearing little or no clothing. It was only in the late 1800's that women were allowed to compete in a limited amount of events.

As few decades ago, women were not allowed to compete at the Olympic Games in Pole Vault, Triple Jump, Hammer Throw, Long Distance Running or Long Distance Race Walking and Steeple Chase.

Even today, many countries do not allow women to participate freely.

This is now well known that the advantages of physical activity are the same for men and women. The principles of training and participation should be based on the physiological development of the individual irrespective of gender.

Muhd Irshad

Sports & Physical Education Department

From the Classroom Bench to the Teacher's chair

Life has a way of coming full circle, and my journey is a testament to this beautiful truth. Years ago, I sat on these very benches as a student, wide-eyed and eager to learn, soaking in the knowledge imparted by my teachers. Little did I know that one day, I would stand in the same classrooms, not as a learner, but as an educator.

The memories of my school days are vivid- the laughter with friends, the gentle guidance of my teachers, and the lessons that extended far beyond textbooks. These experiences instilled in me values that shaped my character and aspirations. Today, as a teacher, I strive to pass on the same wisdom and inspiration to my students.

From the classroom bench to the teacher's chair, my journey is a tribute to the school. It is an honor to give back to this institution, nurturing the next generation with the same care and dedication that I once received.

Ms. Gurmeet Kaur

Teaching in the internet age means we must teach tomorrow's skills today.

-Jennifer Fleming

Technology plays a pivotal role in digital learning, revolutionizing the way students acquire knowledge and skills. With the advent of cutting-edge technologies like Artificial Intelligence (AI), Augmented Reality (AR), and Virtual Reality (VR), digital learning has become more immersive, interactive, and effective. Learning Management Systems (LMS) and online platforms enable seamless access to educational resources, facilitating personalized learning experiences. Moreover, technologies like mobile devices, tablets, and laptops have made learning more accessible, flexible, and convenient. By harnessing the power of technology, digital learning has transformed the educational landscape, enabling students to learn anytime, anywhere, and at their own pace.

Computer Science Department

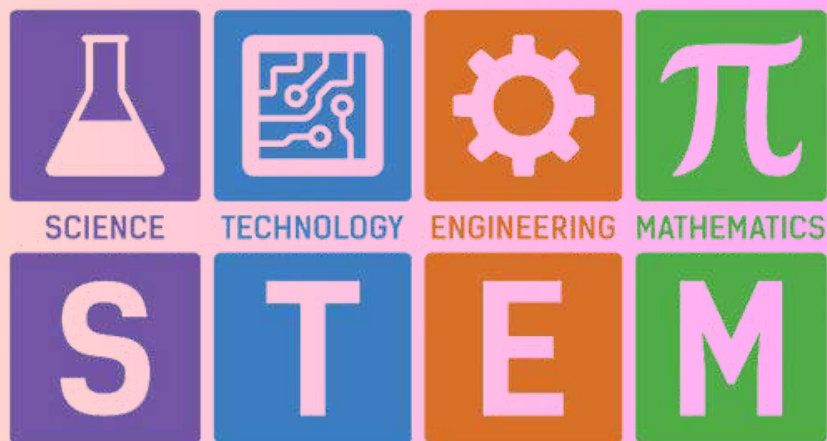

'STEM' - Need of 21st Century Education

K-12 education is a short form used for classes from kindergarten to 12th grade and **STEM** has a lot of importance during those years. **K-12 STEM education** keeps children connected with the real world from a small age. The incorporation of STEM education in K-12 increases the **standard of the things taught** and helps children to choose careers in STEM-related fields. STEM education is a teaching and learning approach that is a unique combination of **Science, Technology, Engineering, and Mathematics**. To be precise, STEM education primarily focuses on **hands-on, project-based & problem-based** learning methodology.

Components of STEM Education :

- Attentive Learning
- Personalized Learning
- Problem-Based Learning
- Collaborative

Pros of STEM Education:

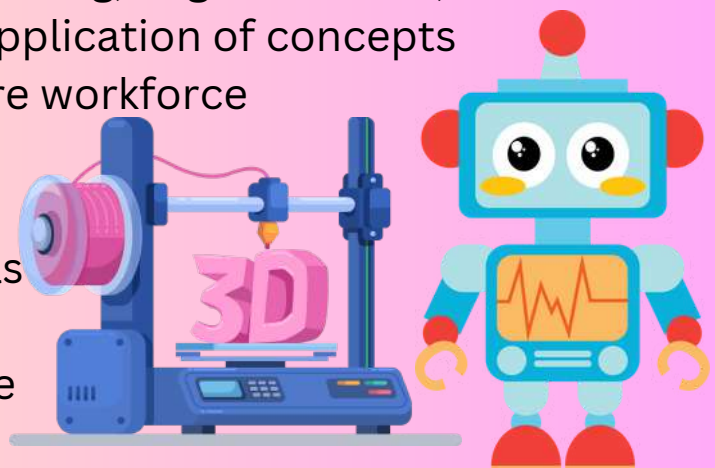

- Widens career opportunities
- Develops resilience
- Develops communication, critical thinking, cognitive skills, etc.
- Allows to understand the practical application of concepts
- Helps in preparing students for future workforce
- Helps in promoting gender equality

Cons of STEM Education:

- No proper guidelines/set of protocols
- Might be costly
- Requires a significant amount of time

Conclusion:

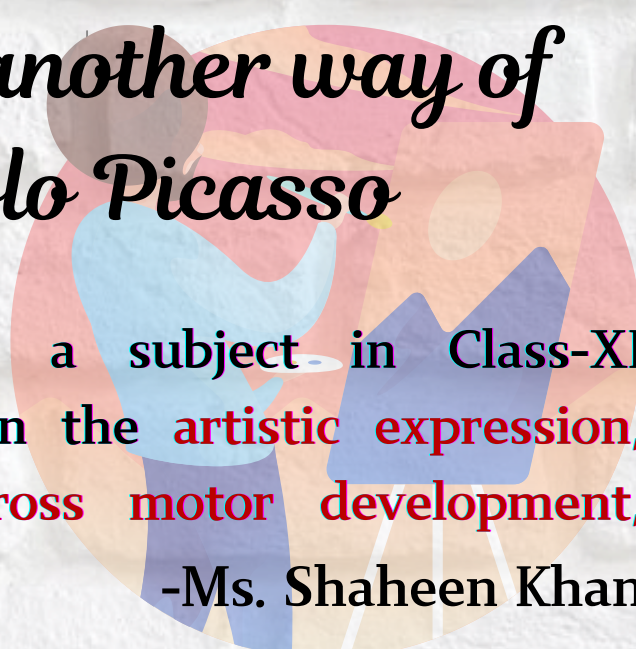

Now that we know a lot about **STEM education** and its prospects, we can make better decisions for our children's careers. One thing that we need to keep in mind is that in this era, the more we work on honing our skills, the better it would be to give us an edge over others. Seeing the importance of STEM Education, **Government of India** had launched **Atal Innovation Mission** to install **Atal Tinkering Labs** in various schools to 'Cultivate one Million children in India as Neoteric Innovators'.

Mariampur Memoirs

As my school days come to an end, I find myself reflecting on the countless memories that have shaped me over the years. I walked into Mariampur at the age of 11 when I got admission to Class V.

Stepping into a whole new world was akin to an adventure. Feeling overwhelmed and unfamiliar I stood inside the school building clutching my bag tightly feeling out of place with hundreds of questions twirling in mind. Though I felt clueless I had a hope of spark in me that this unfamiliar place will soon become a home filled with numerous lessons and adventures.

It was a beginning of a journey that I didn't yet know would shape me in ways I could never imagine. These past 7 years have been a foundation of growth, filled with lessons that extended beyond the classroom. Every challenge I faced be it academic or personal taught me resilience and perseverance. Though, leaving feels bittersweet I see it not as an end but as the beginning of a new chapter. Every memory, from the thrill of achievements to the quiet moments of reflection feel like a treasure that I will carry forever in my heart.

I gradually transformed the apprehensions into determination to tackle situations which now make for invaluable lessons and relish the thrilling experiences which make for cherished memories. Each memory I've gathered—from remarkable achievements to moments of quiet reflection—becomes a treasure I will carry proudly.

The moments spent in the Institution will forever remind me that every ending is a chance to embrace new opportunities and strive for even greater heights. My time in this institution has ingrained in me the belief that every ending is not just a closure but a springboard for new possibilities and an invitation to soar to even greater heights.

I leave with a heart full of gratitude cherishing these Mariampur days as one of the most transforming chapters of my life and memories to be treasured forever.

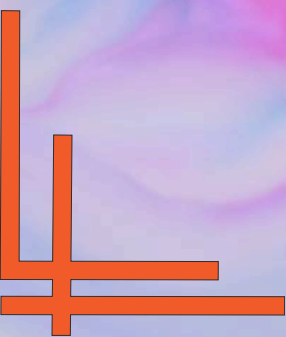

Vanshree Pande
Class – XII Science

YOUR ROLE IN THE VERSE

In this verse called life, everyone has a different role, different character and every character has a different value. You can make this verse worthwhile or you can waste it, leave it undone and give it the reason of 'not fitting in'. In the words of Peter Dinklage "According to aerodynamic laws, the bumblebee cannot fly because its body weight is not in the right proportion to its wing span, but ignoring these laws, the bee flies anyway" meaning it's never about fitting in, it is just about giving in, it is a leap of faith. When you're in a crowd with all eyes questioning you or you're at a podium or in a court during a match or even if you're in front of the mirror, stop playing that role that has been implicated on you by others or by you on your own self. Dear YOU, I sincerely request you to play the role of you in this verse called life, even if you're boxed up, still, take that step, pull off that mask you have on yourself because if you never start running just because the traffic lights around you are either red or yellow, you'll never know that you're a whole world from within disguised in the name of an unknown road of some suburb. Pull that trigger; give things a chance and take a flight even if you fall, it is just a leap of faith you can put all your hopes and guts into to have something real in life because what's destiny without faith and risk? - Just a path, and in the same way, what's a story without the actual 'You'? - Just a piece of paper! So, Dear YOU, Play your role because if not you then who?

ADITI MISHRA
XI - HUMANITIES

The War Within

In a world obsessed with wars, there is a war that no one talks about. A war far more personal. It is the hidden war that we constantly suffer from. The war within, which is not fought with swords or shields but with emotions and expectations.

Every day, we're flooded with questions, Am I enough? Perfect? Deserving of this "insta-worthy" life? There is a constant push and pull between us chasing our ambitions and fulfilling our responsibilities. Deep within, the soul wrestles with the mind, torn between passion and reason, comfort and growth.

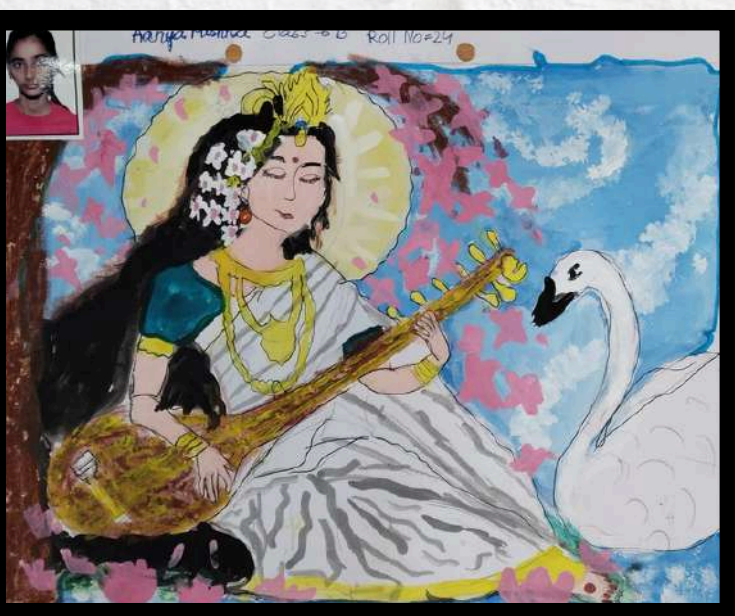

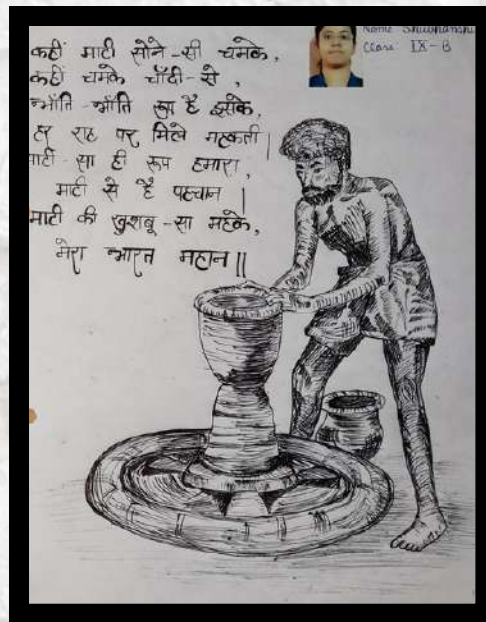

And in this war where the heart and the mind enter the battlefield with their swords, they kill a part of us and make us our own killer. We lose our essence. Our feelings are buried alive, our dreams shed blood and we make our lives hell. Yes, this is the perpetual, silent, unseen war which is deeply felt by everyone, yet nobody ever mentions it.

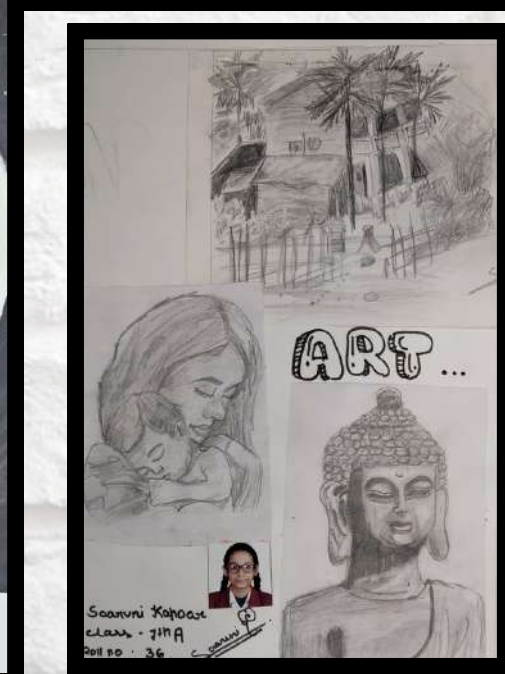

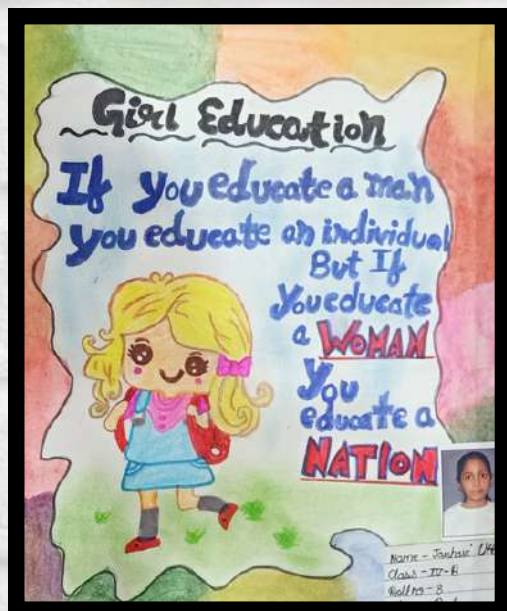

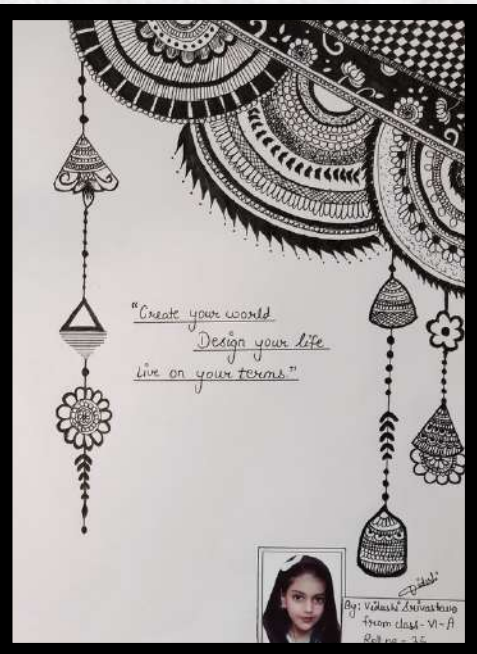

This war doesn't define our downfall; it defines our evolution. The choice is entirely ours to make: we can either let this war break us, or we can rise from the ashes as the creator of our own destiny.

VALUE OF TREES

Do not cut me, Grieve the tree
Because I give you rain free.

In my cool shade you rest,
Eat my fruits that are best.
Take in my fresh smell,
Let me live my life well.

IMPORTANCE OF TREE

NAME: ANGEL NIGAM
CLASS: I'B' ROLL NO:

Power of Dreams

Dreams are the seeds of hope,
Small and quiet,
growing in the corners of our minds,
waiting to take roots.

They give us courage to try
to step forward when the road is unclear
to believe in what seems impossible,
even when no one else does.

Dreams are soft but strong,
Lifting us when we fall.
Whispering "keep going",
when the world feels heavy!

And when they bloom,
they light the way,
turning darkness into gold,
showing us a brighter day!

So dream dear soul & hold it tight
For dreams can turn the dark to light.
In their embrace, life's magic streams
Unleashing the power of endless dreams.

Scenes

Sanskriti

Budding Bards

Whispers of Fall

Night welcomes those with lamps
hugs those with bare hands,
I was in dark wandering without a clear vision
letting my thoughts create a prison,
These voices inside me brewed like the smell of coffee
as I tried to customize myself for the society
But then

The sound of autumn leaves whispered my name
as they fell down with a golden haze,
each rustle a reminder of what I lost
and soon came a wind clearing the paths I crossed
As the season embraced the beauty of let go
I got my vision back with this sudden blow,
Now I understand

The night welcomes those with lamps
and hugs those with bare hands

~ jayjet

A Cry from the Sky

The drops leave the celestial infinity,
and draw down to the oceans in the deep.
The trickle makes the nascent crops reap.

Below the terra firma, the water seeps
and revives the fauna which was once asleep.

I stare at the blue outside,
from my casement, I take a peep.
And wonder, if the rain is just a beautiful maiden weep.

- Aakhya Bajpai
(11th Science)

HOPE

When the sky is dark,
and a storm is near,
when everything feels uncertain,
and all dreams disappear,
when it is too much to handle,
Too heavy to bear.

Hold on to that last ray of light,
The faint voice in your heart that says,
"It'll all be alright."
Because there is always a dawn after
every night,
always a fall before the first flight.
Because in the darkest of corners - where
~~the~~ ^{our} ~~savours~~ ^{savours} cope,
Something shines, it's there, it's hope.

-AMANYA KATIYAR

Shades of Nature

Comprising of the blue limitless sky
birds in it, swaying high & high
Down is the deep blue sea
Home of aquatic life & it's umpteen glee
NATURE IS THAT YOU??

I MOSTLY FIND YOU IN BLUE!

I brush past the green field.
Ready to produce a fine yield.
The huge green trees bearing jewels of fruits.
It's subtle sweet taste gave me a good reboot
NATURE IS THAT YOU??

THIS TIME YOU ARE GREEN & NEW!

Making my way comes unto play
The vibrant sun rays.
The energy it supply replenishes the rest of my day.
Blooming of the yellow flowers.
Whose aroma brings me a great power.

NATURE IS THAT YOU??

IS IT YELLOW IN YOUR VIEW!

The nature answers to my question -
It admits I'm the one!
With different colour & shades
It's me who gave you the rainbow made
My presence highlights my different forms.
Sometimes I am lush & sometimes barren!

गलतफहमी

एक कविता दोहोरी

गलतफहमी भी जरूरी है,
अपनेपन की बातों में,
ये उलझी हुई डोरें ही तो हैं,
जो लाती हैं 'साथों' में।
समझने का सोचा देती हैं,
सहकार लीज कर,
खिल सै खिल की आवाज सुनें,
हर शिक्का तोड़ कर।
समझ कर कुल अनेकहा सह जाए,
एक बार और बोलना।
गलतफहमी भी सैठ नाराजी,
भरा थोड़ा सा खोलना।
ये ही सब सोचा सरल होता तो किसी याद रखते हस,
कभी-कभी उलझने में ही तो अपनेपन का स्वाद रखते हस।
इस में भी अपना संगी है,
कभी खरी तो कभी मोटी सला है,
बातों में थोड़ी तकरार भी तो,
अपनेपन की गहराई का पता है।
ये समझने में हुई चूक,
जो अहसासों की तीव्रता नहीं,
बल्कि नरम अंदाज से फिर,
अपनेपन की जीवनी है कही।
कभी नाराजगी के उस पार
अस्मान की चुप नंबर आती है,
गलतफहमी के लुप्त हो पड़ते हैं भी,
एक नयी बात छुपी जाती है।
भगवत्सुख बिलकुल साथ होता,
ती बातों में रोसांच कही होता?

थोड़ा उलझकर सुलझने
का लुप्त,
खिलने का असली सान
कही होता।
गलतफहमियों की पार
लाती हैं,
दूरियों को मिटा जाती हैं।
प्यार के छोटे-छोटे इंसान,
ठिली सी गहराई किता
जाती हैं।

Kindergarten - Vidyarambham

Mariampur Kindergarten believes that there is nothing more wonderful than the love & guidance a grandparent can give his/her grandchild. The Grandparents felt thankful for the beautiful moments and fun filled games organized by the teachers & their grand children; letting them relive their childhood.

Merry Christmas

Farewell

Guardians of our school: Protecting us every day

**Expressing gratitude
for the watchful eyes
of our security
personnel and driver**

On 21st December 2024, a heartfelt assembly was conducted during Christmas celebration to honour and bid farewell to two cherished members of Mariampur family Rajesh Bhaiya and Krishna Bhaiya. As a token of appreciation both were presented gifts symbolising the lasting impact of their service.

KSS Kho-Kho Girls Open Tournament

Annual Sports Day

Success is where preparation and opportunity meet.

Annual Sports Day was held from 21 to 23 Nov, 2024 for classes I to XII. The Chief Guest for the event was Hon'ble Mr. Samuel Paul N., Managing Director- KESCO who inaugurated the event with torch bearing ritual by the students.

Career Counselling

The school conducted career counselling session for the students who got a glimpse of different possibilities in career choices open to them.
